Art Unit: 3672

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 531-556 and 558-569 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 176-213 of copending application No. 09/841638

Although the conflicting claims are not identical, they are not patentably distinct from other. In this regard, claim 185, currently pending in S.N. 09/841,638, presently allowed, is an obvious variation of claim 531 pending herein. More specifically, both '638 claim 185 and claim 531, pending herein, call for treating a coal formation by providing heat from one or more heaters, controlling a pressure and temperature in the formation wherein the pressure is controlled as a function of temperature, and the temperature is controlled as a function of pressure, and the controlled pressure is maintained at least about 2.0 bar absolute, and wherein the process of claim 531 can be construed broadly enough to encompass the additional limitation in the '638 claim 185 of allowing the heat to transfer "directly". Otherwise, claims 532-556 and 558-569 pending herein appear to essentially correspond to claims 177-184 and 186-213 of the copending '638 application.

Art Unit: 3672

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Applicant's arguments filed with the amendment have been fully considered but they are not persuasive.

With respect to applicant's remarks regarding the obviousness double patenting rejection(s), a terminal disclaimer has now been received and approved, thus overcoming the obviousness double patenting rejection based on S.N. 09/841,437. Such disclaimer, however, does not list the other relied-upon copending application, S.N. 09/841,638, nor is there an additional terminal disclaimer directed to S.N. 09/841,638. Accordingly, the double patenting rejection remains outstanding, as set forth above.

4. Claims 570-609, 623-625, 665-706 and 5150-5194 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Suchfield whose telephone number is 703-308-2152. The examiner can normally be reached on M-F (6:30 - 3:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bagnell can be reached on 703-308-2151. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9306 for After Final communications.

Art Unit: 3672

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
